

What we are...

We are technology driven organization working in the field of device security application, IOT and AI.

REDCAT aims to help the community by providing innovative products based on cutting edge technology to cater to ever changing tastes and demands of our customers.

What do we do...

We work in the following areas:

- **Handset Application (MCOPS)** - We have already launched Mcops, a device security application which protects the device from Physical theft as well as Data theft

- **Finance Product (MCOPS Finance Locker)** - This product is already launched. It helps the retailers to secure their business of Handsets sold on Loan, against Bounced EMI's

- **AI (Artificial Intelligence)** - We aim to bring the sense of control to our users by helping them with remote access of their household appliances and belongings. We have launched a Personality Analysis and Predictive Software which helps users to choose the best career and personality development path based on the analysis of functioning of different parts of Brain

- **IOT (Internet of Things)** - We plan to use IOT, thereby, enabling our users to simplify and secure day to day live further

Why **MCOPS** Android security...

Our cutting edge features:

- Image of the intruder and location of intrusion is captured and shared.
- Forceful Shutdown of the Smartphone is disabled.
- GPS tracking of the lost Smartphone is done by mere text command
- SIM tracker notifies that the SIM has been removed and the information of the newly inserted SIM flows to the lost Smartphone's owner
- Camera operation can be operated remotely even after the device is lost.
- The data important to the User can be erased remotely after the device is stolen.

Why **MCOPS** Finance Locker...

Our cutting edge features:

The Handset of the Defaulters can be Locked remotely.

The Locked Handsets will be as good as a Dummy Handset.

Our Finance Locker cannot be uninstalled by any means.

We are the only one with such a Licensed product by Google in the market.

Why will we be successful...

Our foundation is based on Three Pillars

- Innovation & Continuous upgradation
- Team work
- Trust
